

You are invited!
Saturday, March 28, 1:30-3:30pm
Friends of Lilydale Park's
4th Saturday in the Park Event
A free, family-friendly, all ages event.
No need to rsvp, just come!

This month's theme?

A scavenger hunt to explore Lilydale Park's natural history!

National Park Service ranger, Amy Meissner, will be our guide.
We will hike the Brickyard Trail looking for geological treasures & clues to Lilydale Park's grand and amazing natural, geological history, including the mystery of the disappearing waterfall that rivaled Niagara!

Meet in the Lilydale Park "parking lot" people use when hunting fossils.

Where is that? Directions:

From the West (Harriet Island/downtown Saint Paul): Take Water Street west, away from Harriet Island to the spot where the road curves toward the river & back. To your right will be the bike path & remains of an old railroad trestle. Don't follow the curve; go straight ahead into a gravel drive. 3.28 the parking lot will still likely be blocked off (no winter parking), so please be creative, smart & safe parking along the road there.

From the East: (I-35E & Hwy 13, the Pool & Yacht Club): Take Lilydale Road (same as Water Street) east past Pickerel Lake. You'll come to a bend in the road. On your left you'll see the bike path & the remains of an old railroad trestle. As you curve right, veer off road onto a gravel drive. That's where you want to be. 3.28 the parking lot will still likely be blocked off (no winter parking), so please be creative, smart & safe and park along the road there.

The route & conditions:

We will start at the bottom of the Brickyard Trail, walk up & then back down.

Please come prepared for Spring/Winter trail and weather conditions!

While we will take the walk slow & easy, the trail's steepness at points & current condition may make it somewhat challenging.

Questions? Please e-mail lilydalepark@oldmanriver.com or call Grit or Jon: 651-227-2264.
